

B4B

Simple, secure electronic bank transfers for Infor SunSystems

What is B4B?

B4B provides a link between the payables module within Infor SunSystems and your bank for Electronic Funds Transfers (EFT) or internet banking.

It is an easy to use, sophisticated payment management tool catering for today's global banking requirements, including the complexities associated with international payments.

Why choose B4B?

Designed exclusively for Infor SunSystems

- Embedded B4B shortcuts within Infor SunSystems provide a seamless link to the user
- Bank details are automatically synchronised from B4B to Infor SunSystems on a real-time basis
- Multiple Infor SunSystems payables are optionally consolidated into a single batch file for transmission to the bank - saving time and effort.

Local & international capability

- B4B supports CHAPS, Faster Payments, SEPA, BACS, International as formats/banks allow
- Large library of existing formats for domestic and international payments. We will most likely have your bank's format
- Constant development of new formats
- Allows multi-national organisations to set up a global payments operation from a shared service centre or payments factory
- A global solution that is quickly implemented and the most widely used EFT solution by Infor SunSystems sites worldwide.

Powerful & Secure

B4B helps you minimise any exposure to loss in your bank payment processes. It can apply approval control at a systems and/or business unit level. A key part of fraud prevention is your organisation implementing the appropriate separation of duties.

- Key data is fully encrypted within the database and there is an option to apply PGP Encryption to the bank file if your bank can accept encrypted files
- Audit control tracks all changes to key system data & provides parameter driven audit reports
- System audit includes password control and rules
- Allows for segregation of roles and security adding better control and auditability
- Approval matrix to assist in fraud prevention
- Changes to the bank details are managed within B4B and the system includes an approval process for managing these changes and pushes the change seamlessly into Infor SunSystems
- Continually updated to support all bank payment types that are required in your day to day activities
- Extensive capability for management of supplier bank details
- Bank details are held in a format specific to each country, bank and payment type ensuring accurate data input.

Saves you time & money

- When B4B is used together with eRemit you will eliminate cheque preparation and cheque/remittance postage. Your staff will be happy that there is no more mailing cheques and remittances
- Real time integration with Infor SunSystems saves time
- By reducing manual tasks, you get lower incidents of costly mistakes
- Direct payments into your bank's own delivery channel without having to rekey data
- Saves time and effort in payment transfer activity
- Reduces inaccuracy effort spent re-keying data and the cost of this in your AP staff's time

- Reduces costs through use of your banks payment services rather than using an agency
- Brings international and domestic transfer in to the same framework for clarity and understanding.

“*B4B makes light work of overseas payments and the staff are always commenting on its ease of use. We achieved return on investment within the first month of implementation.*”

FEATURES THAT MAKES B4B POWERFUL OUT OF THE BOX

	Supports generation of debits and credits		Web enabled to allow deployment through a range of browsers
